

STATE - NEWS.

Florida has \$123,416 invested in flour and grist mills, and the value of the products is \$302,737.

Apalachicola is going to try her hand at the street fair business. She will have one for five days, beginning April 8.

The monthly report of State Treasurer Whitfield shows a balance of \$309,087.20 to the credit of the different State and educational funds.

Philip Hass, who has recently invested largely in Miami real estate, is now in the north buying machinery to erect an extensive plant for the quarrying of the famous Miami building stone. This plant will be located just across the river, and will be in operation as soon as men and money can get it and up.

Thos. A. Edison, the great inventor, and his family, including Mrs. Edison and children, arrived here on the steamer H. B. Plant on Monday, Capt. Gonzalez hoisting the flags on his steamer in honor of his distinguished passengers. They came direct from New Jersey to spend a month at their home on the Caloosahatchee, in the west end of town.—Fort Myers Press.

Capt. A. N. Pacetti drove by The Record office last week with a wagon-load of as fine cabbage as ever went to market. There were but twelve cabbages in the load, but they filled the body of the wagon completely, some of the heads being at least fifteen inches in diameter. They were grown in the captain's garden right in town.—St. Augustine Record.

John Bozeman, a young white man living near Live Oak, had the misfortune to break his right arm in rather a peculiar manner last Monday morning. He was plowing an animal that would not "gee" when told to do so, and in order to force the command, Mr. Bowman jerked his plow line rather vigorously. In doing so his arm was broken above the elbow. He says he does not know whether it came in contact with the plow handle, though this is the only solution of the results.—Democrat.

Dr. J. B. Foley, the wealthy Chicago proprietary medicine manufacturer, has bought from the Southern States Lumber Company of Pensacola 25,000 acres of fertile farm lands in Baldwin county, Ala., near the Florida state line. The purchase price was about \$4,000. Included in the purchase is the famous Magnolia Springs, where Dr. Foley will build an elegant winter home. He will spend large sums improving the property. It is said his plans include making Magnolia Springs a famous tourist resort, and that a handsome hotel, cottages, etc., will be built there.

As a result of a slight altercation, Henry Byrd, a young man employed at the Tiger Bay phosphate works, lies at the point of death with a pistol shot wound in the right breast, inflicted by Lucien Huckleby, a young man of about seventeen. It seems that Huckleby had threatened to shoot Byrd at sight the first time he should meet him, and indulged in very harsh language about Byrd, who upon being told of it called on Huckleby, at the latter's house. Before Byrd had mounted the steps leading to the porch, Huckleby came to the window and fired a 44-calibre pistol ball at him. There is little hope for Byrd's recovery, the physicians having been unable to locate the ball which ranged from the right breast to the left and downwards. Huckleby was soon apprehended and lodged in jail.—Ft. Meade Cor. T. U. & C.

The Jasper Normal Institute is prospering in a manner highly gratifying to its patrons. Over three hundred students are in attendance and the number of pupils from abroad are fifty per cent over the attendance of last year.—News.

Within a few days, the Seaboard Air Line officials will announce the date for the opening of the new extension of the system to Palmetto. The contractors are hurrying up the work, and although delayed considerably by the lack of material, will soon have the road ready for the first train.

It is stated in Pensacola that the Louisville and Nashville Railroad will erect a car building shop in that city at an estimated cost of \$500,000, and in which several hundred skilled workmen will be employed. It is understood a large tract of land has been purchased on which the plant will be located.

The Florida Horticultural Society will hold its annual meeting at Tampa May 20-23. This is the first time in its history that the society has gone so far south. It is in some sense a recognition of the growing importance of extreme South Florida in the fruitgrowing line. Tampa is to-day not only the cigar city but the orange city of Florida. A very interesting session is expected, as there are many matters of importance to discuss.

Chauncey Bros. of this place, have made and had patented a wonderful labor-saving machine which they call "Chauncey's Automatic Gin Feeder." It can be attached to any gin, either for long or short cotton, the cotton is poured into it by the basketful and it feeds it to the gin regularly and uniformly. It can be set to feed any desired quantity per hour. This invention is not only a great labor saver, but it does the work much better than it is possible to do it by hand.—Jasper News.

The Grand Lodge Knights of Pythias, in session at Tampa last week, elected the following State officers: W. A. Allen, DeLand, grand chancellor; J. E. Crane, Tampa, grand vice-chancellor; George S. Hallmark, Pensacola, grand prelate; W. H. Lattimer, Tavares, grand keeper of record and seal; W. C. West, Jacksonville, grand master of exchequer; George W. Reynolds, Key West, grand master-at-arms, Henry Horseler, Pensacola, grand inner guard; L. C. Lynch, Gainesville, grand outer guard. The Grand Lodge voted to hold all future meetings in Jacksonville, which has been named headquarters for the State.

Mr. Frank Willis, stenographer and law student in the law office of Judge George P. Raney, brought to this office a few days ago the greatest curiosity we ever saw in the shape of a hen egg, or eggs, in fact, for there were two of them. They were fresh laid, covered with a shell nothing more than a tissue in thickness and as soft and flexible as a piece of well dressed sheepskin, and remained so. The most peculiar feature of these eggs, however, is the fact that they are inseparably joined together by a small tube a little larger than a lead pencil. This tube was a half or three-quarters of an inch long, and is filled with the same white substance that surrounds the yolk in all eggs; completely joining the two. Unfortunately the hen in getting off the nest punctured the thin covering of one of the eggs and through this the substance of both is slowly oozing out, destroying the curiosity.—Tallahasseean.

No subscription received at this rate for a less period than one full year. Now is the time to subscribe.

THE
NEW ENTERPRISE,
MADISON, - - - FLORIDA.

Effective December 1st, important changes in the schedule and additional trains were inaugurated on the Seaboard Air Line Railway. The Florida and Metropolitan Limited through train between New York and Jacksonville via Washington and Richmond, is quickened in schedule to arrive in Jacksonville 3:50 p. m. instead of 6:10 p. m. as formerly. The New York and Florida Fast Mail, known as trains 27 and 66, will arrive at Jacksonville 9:05 a. m. instead of 9:15, while the departure will continue at 7:40 p. m. All three of these trains make connection in both directions for Brunswick, Ga., via Thalmann and the Brunswick and Birmingham Railroad.

LEGAL ADVERTISEMENTS.
